

The Paradox of Gender Equality: How American Womens Groups Gained and Lost Their Public Voice (The CAWP Series in Gender and American Politics)

Drawing on original research, Kristin A. Goss examines how womens civic place has changed over the span of more than 120 years, how public policy has driven these changes, and why these changes matter for women and American democracy. Suffrage, which granted women the right to vote and invited their democratic participation, provided a dual platform for the expansion of womens policy agendas. As measured by womens groups appearances before the U.S. Congress, womens collective political engagement continued to grow between 1920 and 1960 when many conventional accounts claim it declined and declined after 1980, when it might have been expected to grow. This waxing and waning was accompanied by major shifts in issue agendas, from broad public interests to narrow feminist interests. Goss suggests that ascriptive differences are not necessarily barriers to disadvantaged groups capacity to be heard; that enhanced political inclusion does not necessarily lead to greater collective engagement; and that rights movements do not necessarily constitute the best way to understand the political participation of marginalized groups. She asks what women have gained and perhaps lost through expanded incorporation as well as whether single-sex organizations continue to matter in 21st-century America.
