

6 Steps to Gender Equality

This collection of essays on gender equality in academia explains where we were at, why we were stuck and how we can move forward. Curt Rice's writings are based on research about career choices and what lies behind them. He demonstrates that all of us have subconscious bias against scientists who are also mothers in areas ranging from hiring and promotion to peer review. He also demonstrates that a mere commitment to fairness is not enough to get fair results. But the challenges Rice identifies are ones he also answers, giving clear examples of strategies universities can use to improve their gender balance and thereby the quality of the work they produce.
